

Appendix

App icon setup for iOS / Android and Desktop Browsers

Guide to walk users through the setup of an application icon (bookmark) for mobile device users. The following guide may vary based on the operating system and browser version used.

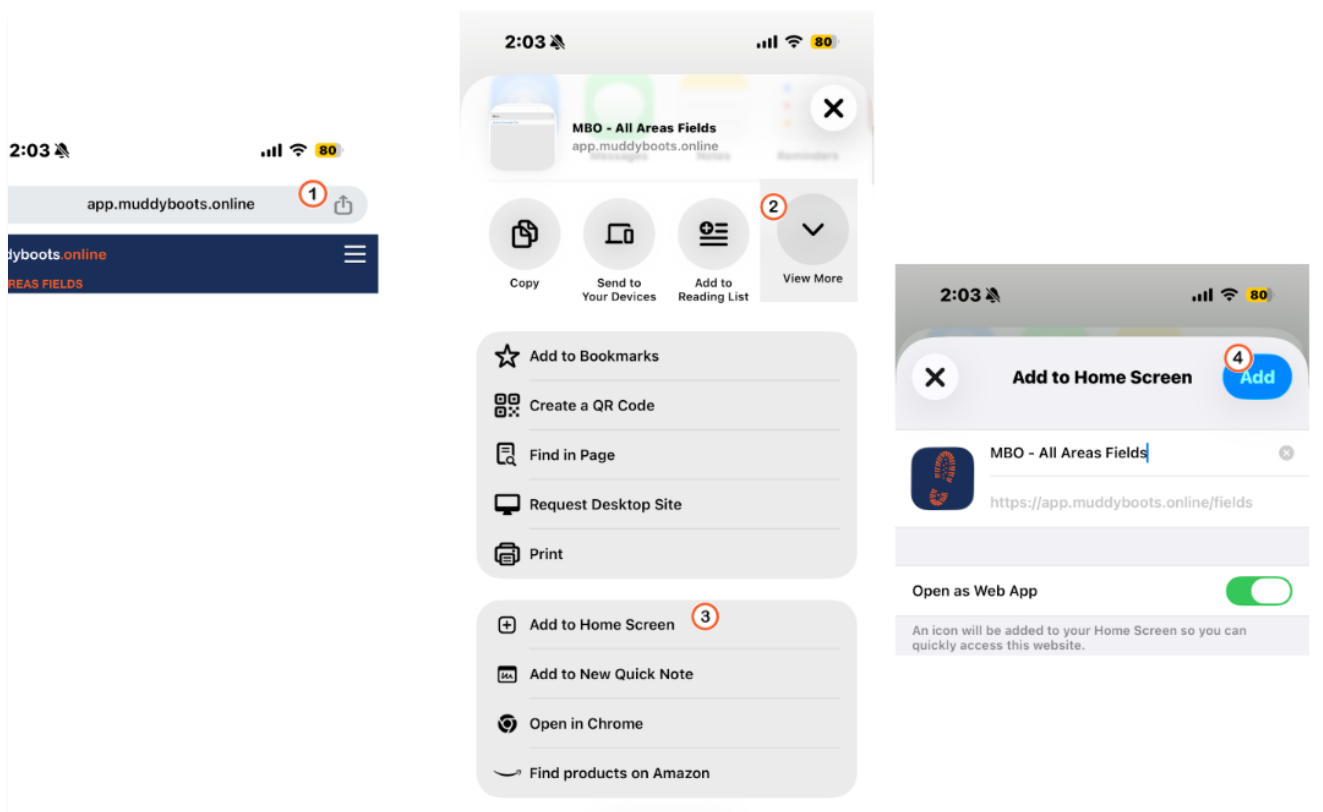

(a) iOS (Version: 26): Safari

- Navigate to app.muddyboots.online on your mobile device web browser.
- Login with your company credentials and navigate to the desired app homepage.
- ① Select the Menu Drop Down (bottom right hand corner).
- ② Select Share.
- ③ Navigate to the bottom to select Add to Home Screen.
- ④ Rename and select Add in blue.

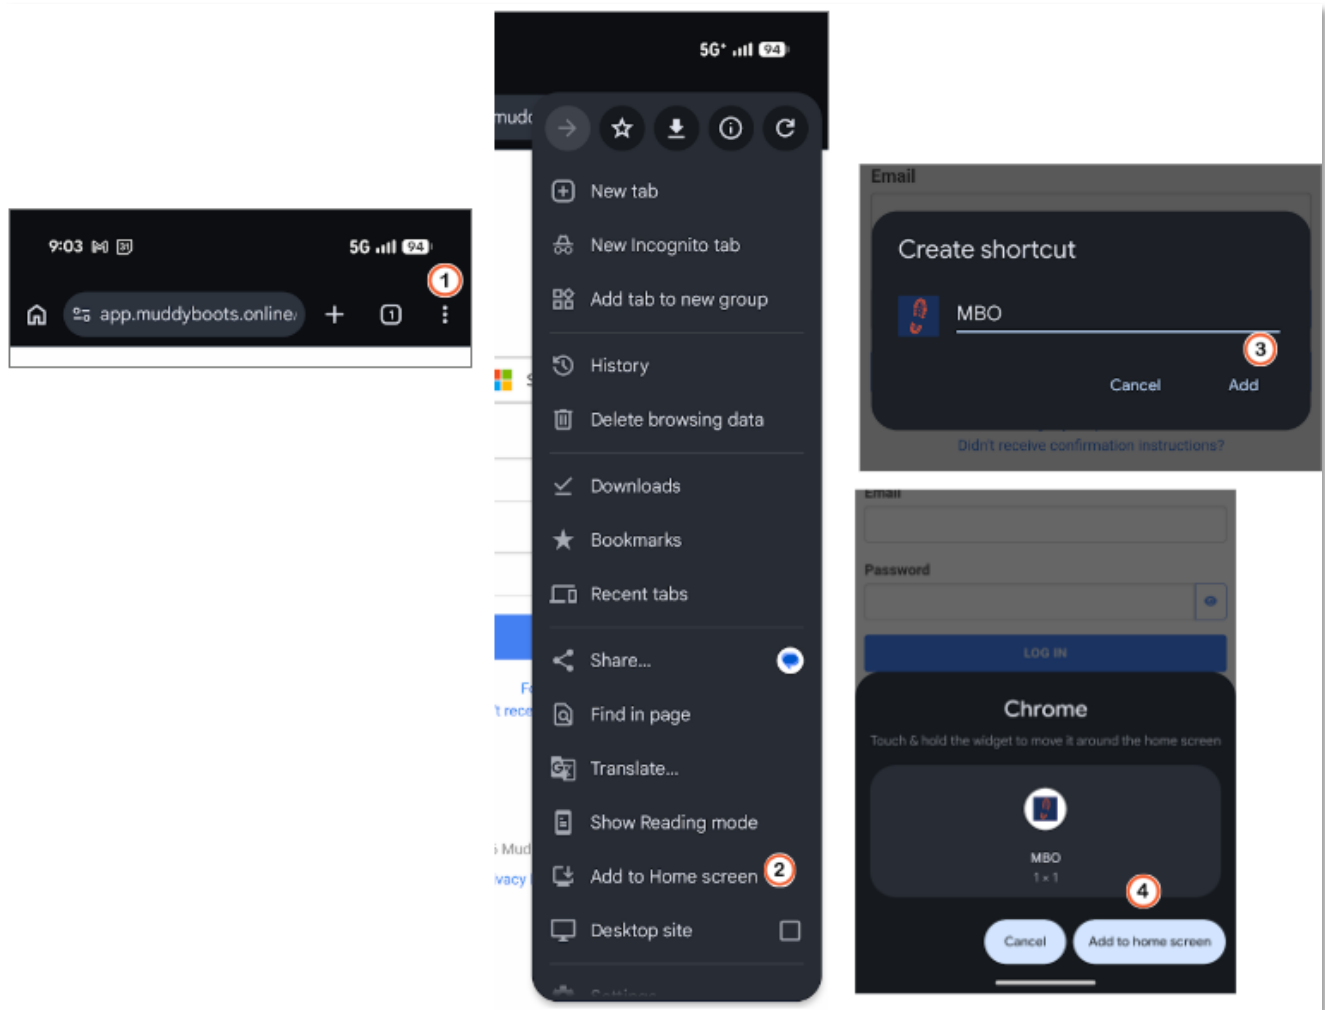

(b) iOS (Version: 26): **Chrome or Microsoft Edge Browser**

- Navigate to app.muddyboots.online on your mobile device web browser.
- Login with your company credentials and navigate to the desired app homepage.
- ① Select Share icon (top right corner)
- ② Navigate to View More (or Scroll Down)
- ③ Select Add to Home Screen
- ④ Rename and select Add in blue.

(c) Android (Version: 16): **Chrome Browser**

- Navigate to app.muddyboots.online on your mobile device web browser.
- Login with your company credentials and navigate to the desired app homepage.
- **1** Select the Menu Drop Down in the top righthand corner of your browser.
- **2** Select Add to Home Screen
- **3** Name the Shortcut icon and select Add.
- **4** Select Add to Home Screen.

(d) Android (Version: 16): **Firefox Browser**

- Navigate to app.muddyboots.online on your mobile device web browser.
- Login with your company credentials and navigate to the desired app homepage.
- **1** Select the Menu Drop Down in the top righthand corner of the browser.
- **2** Select Page.
- **3** Select Add Page Shortcut.
- **4** Select Add Automatically.
